CURRENT SERIAL RECORDS

July 25, 1966

WHEAT STOCKS SHARPLY LOWER--SOYBEANS UP SLIGHTLY

All wheat stocks on July 1 were one-third less than last year and the smallest since 1952, according to the Crop Reporting Board. Durum wheat stocks were 19 percent below a year earlier. Soybean holdings were slightly above the July 1965 total. Stocks of the four feed grains totaled 74 million tons--8 percent less than last year and 24 percent below average. Rye stocks were 43 percent larger and flaxseed holdings were 32 percent more than last year.

All wheat in storage on July 1 totaled 536 million bushels--the smallest July 1 stocks since 1952. Carry-over on July 1 last year totaled 818 million bushels. Most of the decline from last year occurred in off-farm holdings. Wheat stored in off-farm positions totaled 405 million bushels, 41 percent less than July 1, 1965. Farm stocks, at 131 million bushels, were below last year by 1 percent. July 1 stocks in all positions indicate a disappearance during the crop year--July 1, 1965 to June 30, 1966--of 1,608 million bushels, 17 percent above the 1964-65 crop year disappearance.

Durum wheat stocks in all storage positions on July 1 totaled 54.9 million bushels, 19 percent less than a year earlier. Farm stocks, at 23.9 million bushels, were 24 percent above a year earlier. Off-farm holdings of 31.0 million bushels were 36 percent below July 1, 1965. July 1 stocks indicate a disappearance during the crop year ended June 30, 1966 of 81.5 million bushels, compared with the previous crop year disappearance of 40.2 million bushels.

Rye in storage on July 1, at 18.5 million bushels, was 43 percent larger than the July 1, 1965 holdings. Farm stocks totaled nearly 4.0 million bushels, 46 percent above a year earlier while off-farm holdings of 14.5 million bushels were 42 percent larger. Nearly 55 percent of the total stocks were either Government owned or under Government loan.

Crop Reporting Board

Washington, D. C.

Corn stocks in all storage positions on July 1 totaled 1,814 million bushels--6 percent less than a year earlier and 26 percent below average. This is the smallest July 1 stocks since 1956. Current holdings indicate a disappearance of 1,086 million bushels during April-June--a record for the quarter.

Farm stored corn totaled 1,347 million bushels, 5 percent more than a year earlier, but 6 percent below average. Corn under Government loan made up 34 percent of the farm stocks, compared with 46 percent a year earlier. Off-farm stocks of 468 million bushels were 28 percent below a year earlier and the smallest since 1954. Corn owned by or under loan to CCC made up 81 percent of the off-farm total compared with 75 percent last year.

Oats stocks in all positions totaled 323 million bushels, 14 percent larger than holdings of July 1 a year ago and 11 percent above average. Both farm and off-farm stocks were above a year earlier. About one-third of the oats in all storage positions were owned by CCC or under Government loan. Disappearance during the April-June quarter was 226 million bushels compared to 190 million bushels during the comparable period of last year.

Barley stored in all positions on July 1 totaled 108 million bushels. This was 6 percent more than a year earlier but nearly 25 percent less than the 1960-64 average July 1 holdings. Larger farm holdings more than offset declines in off-farm positions. Stocks owned by CCC or under Government loan represented 18 percent of the total compared to nearly 35 percent of the total last year. Disappearance during the April-June quarter, at 91 million bushels, was 12 million bushels below last year but 1 million bushels above the average disappearance for this period.

Sorghum grain in all storage positions on July 1 totaled 534 million bushels--19 percent less than a year earlier and 25 percent less than average. The sharp decrease from a year earlier occurred in off-farm stocks. Farm stocks of 73 million bushels were nearly 10 million bushels above July 1 a year ago and a record high for this date. Sorghum grain owned by CCC or under Government loan accounted for about 92 percent of stocks held in all positions. Disappearance of 192 million bushels during the April-June quarter was a record high for the period.

* Included in other States to avoid disclosing individual operations.

1/ Includes stocks at Mills, Elevators and Warehouses, terminals, processors and those owned by Commodity Credit Corporation which are in bins and other storages under C.C.C. control.

2/ Off-farm total plus farm stocks.

Soybean stocks in all storage positions on July 1, 1966 totaled 134 million bushels, compared with 131 million bushels held a year earlier and the 1960-64 average of 138 million bushels. The 6 percent increase in off-farm holdings was nearly offset by a 16 percent decrease from last year in farm stocks.

Soybeans owned by CCC, or under loan, including purchase agreements, accounted for 7 percent of the total stocks.

July 1 stocks indicate a disappearance during the ten-month period September 1965-June 1966 of 740 million bushels from a supply of 874 million bushels (carry-over of 30 million bushels plus 1965 production of 844 million bushels). During the period 455 million bushels were crushed and 227 million were exported. Soybeans used for seed and feed are expected to total about 44 million bushels.

Flaxseed stocks in all storage positions on July 1 totaled 14.4 million bushels, an increase of 3.5 million bushels over July 1 holdings a year ago. Off-farm stocks, which account for 76 percent of the total, increased 2.5 million bushels while farm stocks advanced 1.0 million bushels over last year. Flaxseed owned by CCC or under Government loan accounted for 94 percent of the total stocks. July 1 holdings indicate a disappearance during the crop year ended June 30 of 31.7 million bushels.
